REVIEW

for the educational-professional program "Finance, Banking and Insurance"
of the second (master's) level of higher education in the specialty
072 "Finance, Banking and Insurance"
Bila Tserkva National Agrarian University

In the context of global financial instability, the issue of quality training of higher education in the field of finance, banking and insurance is a priority component of the integration of educational programs in the European educational and scientific space. That is why there is a growing need for highly qualified professionals, competent financiers, analysts, financial advisors with innovative thinking, capable of continuous improvement of knowledge and decision-making in today's dynamic global environment.

Bila Tserkva National Agrarian University is one of the leading agricultural educational and research centers in Ukraine with a developed infrastructure, which trains competitive, innovation-oriented specialists in various educational and professional programs. In particular, the presented educational and professional program "Finance, Banking and Insurance" in specialty 072 "Finance, Banking and Insurance" is developed by highly qualified research and teaching staff who are constantly improving their professional skills and pedagogical skills by attending lectures, seminars, round tables both within the country and abroad. The program aims to develop the ability of higher education students to solve complex professional problems and practical problems in the field of finance, which involves research and application of modern financial technologies and innovative approaches in conditions of uncertainty. Implementation of the program allows to master the latest financial technologies by organizing industrial undergraduate practice in financial departments and services of enterprises of various forms of ownership, banking institutions, insurance companies, financial market organizations and government agencies, as well as training and defense.

Positively assessing the content of the educational and professional program "Finance, Banking and Insurance", we believe that in order to strengthen general and professional competencies to substantiate in terms of methodological tools and increase the reliability of empirical research in qualifying work, it would be appropriate to include a seminar to prepare and write a master's thesis.

Developed educational and professional program "Finance, Banking and Insurance" in specialty 072 "Finance, Banking and Insurance" has all the necessary structural and substantive components, the list and scope of compulsory and optional educational components correspond to the structural and logical scheme of training applicants for higher education education and are designed to contribute to the provision of program learning outcomes, which gives grounds to recommend a peer-reviewed educational and professional program for implementation in the educational process.
