PhD, assoc. prof., Department of Information systems and technologies  
Faculty of Economics

Bila Tserkva National Agrarian University

### ON PARTICIPATION IN THE ERASMUS+ K107 ACADEMIC MOBILITY PROGRAMME

In April 2023, I was pleased enough to visit the Lazarski University in Warsaw as part of the Erasmus+ International Credit Mobility programme for academic staff (staff exchange for teaching). To participate in the competition, the following documents had to be submitted by the deadline: CV, motivation letter, certificate of language proficiency, detailed work plan of mobility. Then the topics of the lectures were agreed upon with the representatives of the host country for a total of 8 hours: 1. Forecasting of social and economic processes; 2. Qualitative and quantitative forecasting methods (practical cases); 3. Analytical methods for obtaining, processing and refining expert measurements; 4. Quantitative methods for analyzing expert opinions and judgments (practical cases).

It is extremely responsible to represent your university in another country by teaching foreign students, but it is also extremely exciting to immerse yourself in the classical atmosphere of European approaches to teaching. I would like to thank Katarzyna Zielińska, Erasmus+ Institutional Coordinator, and representatives of the Faculty of Economics and Management of the Lazarski University in Warsaw, Katarzyna Marton-Gadoś and Martin Dahl, for the excellent organisation of the mobility visit, sincere support and for the positive assessment of the work done. We managed to implement the teaching programme in full for foreign groups of students of different study programmes. In addition, we took part in a joint meeting of the management of the Faculty of Economics and Management, Katarzyna Zielińska and Erasmus student of Bila Tserkva National Agrarian University Valentyn Honchar and got acquainted with the curricula and international programmes of the faculty and the university as a whole; talked about the possibility of obtaining a double diploma by university students; double supervision of qualification works of both bachelor's and master's level students; guest lecturers; joint scientific activities; and joint research. They discussed the possibility of submitting a joint application for the KA2 project in the future. We looked at the entire material base and learned from the experience of the Student Helpdesk. The acquired knowledge will be implemented in the educational process in the field of economic forecasting.

Along with this, Erasmus+ programmes provide an opportunity to get acquainted with the cultural traditions of the country, visit historical and artistic heritage. Exchange programmes provide huge opportunities: it is self-improvement of your professional skills, gaining experience in the teaching style and the Polish higher education system from the inside. I definitely recommend the Erasmus+ programme to all teachers and students who are confident in their abilities and are not afraid to discover new horizons, because Erasmus+ erases borders.

All the advantages and opportunities of the programme, in which I was able to participate, were communicated to the staff of the Faculty of Economics of Bila Tserkva National Agrarian University, a participant in the Erasmus+ International Credit Mobility academic exchange programme.
